## **DETAILED ACTION**

### ***Reasons For Allowance***

1. Claims 9-21 are allowed.

The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of claim 9 is the inclusion of the limitations being for a tape printing apparatus including means for detecting, based on the line analysis result, a duration of the consecutive blank lines when printing is not consecutively performed while the tape is moved, due to the consecutive blank lines on the tape in a longitudinal direction and applied energy adjusting means for adjusting the energy applied to the print head in printing each of the print lines, based on the duration of the consecutive blank lines and the number of the consecutive print lines from the line analysis result. It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

2. The primary reason for the allowance of claim 17 is the inclusion of the method step detecting a duration of consecutive blank lines based on the line analysis result when printing is not continuously performed, while the tape is moved, due to the consecutive blank lines on the tape in a longitudinal direction and adjusting energy to be applied to the print head in printing a print line, based on the duration of the consecutive blank lines and the number of the consecutive print lines according to the line analysis result. It is these steps found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.
